

OAKLAND
GREEN
FARM

Locally Raised, All Natural Black Angus Beef

Steaks, Roasts, Ground Beef
and more...

We have been raising Black Angus cattle at our family farm in Loudoun County, Virginia, for more than 20 years. Our animals enjoy wide open spaces with plenty of access to fresh pasture and clean water. They are finished on farm on locally grown grain for 75 days so they never see the confines of a feedlot. We never inject our animals with growth hormones or steroids and use antibiotics only when necessary (almost never). We are pleased to now offer frozen individual cuts of our beef direct to consumers. Please call to arrange a time to come pick up your order.
